(Pre)cognition...

The Mind Universe... Mental Dimensional Theory

Mind/Data Universe

MEGA COMPUTER-LIKE BRAIN... (with a tap-able Wi-Fi system as well?) More accurately... Wi-Fy... as in Wireless Frequency emitter... transmitter... receiver.

Are thoughts within the realm of Quantum Physics... or are thoughts simply electrical pulses within the three known spatial dimensions that occupy brain matter, neurons, and the nervous system?

How much can the brain model the known universe as brain matter and the unknown universe as the abstract concept known as the mind with its unconscious state, subconscious state and conscious state?

Is there a dark matter equivalent of the unconscious state?

Are perceptions a biproduct of multiple states of the conscious/subconscious/unconscious and thus multiple perceptive universes wherein the concept of universe needs to be redefined as separate energy sources from which all things perceptual spring?

Should all minds be perceived as separate realities within a shared space.

Given the complexity of the mind, the mind is vastly capable of unlocking the complexities of the universe... known and unknown... by sheer example, especially if the mind is capable of any existence beyond the confines of the brain.

What is the atomic/sub-atomic structure of thoughts?

If the brain can pick up radio waves... what else can the brain pick up?

Quantum mind mechanics = mental illness... or overly/less sensitive to data/binary stimulus... "misfiring" data (uncertainty principle?)... of a quantum dimension??? Uncertain perception of reality

Jones index, secret sharing and total quantum dimension http://iopscience.iop.org/article/10.1088/1367-2630/aa5c0c/pdf

<u>Digital data</u> can be encoded and transmitted via FM by shifting the carrier's frequency among a predefined set of frequencies representing digits - for example one frequency can represent a <u>binary</u> 1 and a second can represent binary 0. This modulation technique is known as <u>frequency-shift keying</u> (FSK). FSK is widely used in <u>modems</u> and <u>fax modems</u>, and can also be used to send <u>Morse code</u>. <u>Madioteletype</u> also uses FSK. Lea https://en.wikipedia.org/wiki/Frequency_modulation

Send/receive transmission... what are the gravitational factors of a transmission?... can these factors influence time factors?... what are the quantum variables (sub-atomic... scales... inter-solar?)?

Human quantum entanglement... planetary level of atomic systems/subsystems... of the wormhole theory

<pure Quantum state, wiki>: Mathematically, a pure quantum state can be represented by a RAY
<electrically charged thought?> in a Hilbert space over the complex numbers (a+bi... where a and b are
real numbers and i is the imaginary unit. The ray is a set of nonzero vectors differing by just a complex
scalar factor to represent the ray and thus the state. A unit vector is usually picked, but its phase factor
can be chosen freely anyway. Nevertheless, such factors are important when state vectors are added
together to form a superposition. <<<swirl vs. triangle???... or triangle superimposed over swirl???
What is the 3D representation?... cubic equation... of a golden ratio/spiral>>>

Hilbert space is a generalization of the ordinary **Euclidean space** and it contains all possible pure quantum states of the given system. If this Hilbert space, by choice of **representation** (essentially a choice of basis corresponding to a complete set of **observables**), is exhibited as a **function space** (a Hilbert space in its own right), then the representatives are called **wave functions**.

QUANTUM TIME IN EUCLIDEAN SPACE... (imaginary time <wiki>)

DOI: https://doi.org/10.1016/j.tics.2012.10.007

Euclidean space <wiki>... in geometry, euclidean space encompasses the two-dimensional euclidean plane, the three-dimensional space of euclidean geometry, and certain other spaces.... The term "euclidean" distinguishes these spaces from <u>other types of spaces considered in modern geometry</u>. Euclidean spaces also generalize to <u>higher dimensions</u>.

EARL K. MILLER, MIT

Rhythmic brain waves: Fluctuations in electrical activity may allow brain to form thoughts and memories

Oscillation as consciousness

The researchers are now trying to figure out how these neural ensembles coordinate their activity as the brain switches back and forth between different rules, or thoughts. Some neuroscientists have theorized that deeper brain structures, such as the thalamus, handle this coordination, but no one knows for sure, Miller says. "It's one of the biggest mysteries of cognition, what controls your thoughts," he says. This work could also help unravel the neural basis of consciousness.

"The most fundamental characteristic of consciousness is its limited capacity. You only can hold a very few thoughts in mind simultaneously," Miller says. These oscillations may explain why that is: Previous studies have shown that when an animal is holding two thoughts in mind, two different ensembles oscillate in beta frequencies, out of phase with one another.

"That immediately suggests why there's a limited capacity to consciousness: Only so many balls can be kept in the air at the same time, only a limited amount of information can fit into one oscillatory cycle," Miller says. Disruptions of these oscillations may be involved in neurological disorders such as schizophrenia; studies have shown that patients with schizophrenia have reduced beta oscillations. https://www.sciencedaily.com/releases/2012/11/121121130815.htm

Time constant in relation to space (fixed) as time expands (singularity/co-occurance)... what is the continuum?

Expansion of space-time (not time-space)... order of magnitude (of a co-occurrence)

What is the mental connection... or is the connection mental?

space-time

noun

1.

(**physics**) the four-dimensional continuum having three spatial coordinates and one time coordinate

that together completely specify the location of a particle or an event

MENTAL/SPACE-TIME ROUTER
TRAVERSABLE NETWORK LINKS/NODES (STAR/NUCLEUS SYSTEM)
TRAVERSABLE SPACE-TIME

NON-ROUTABLE Dissipation of energy (quantum) (diluted/diffusion) as opposed to fusion energy

Quantum time-energy Synaptic gap... misfiring Brainwave entrainment/stimulation Binary regulation
Vibratory... frequency... controlled/random
Molecular level time travel/galaxy level time travel
Time frequency factor... size/scale factor
Time marked by "events" (controlled/random... singular/cooccurring)
Energy event... energy oscillation event

Overlapping space-time...

RANDOM ACCESS MEMORY (PERFORMANCE OF SPEED/TIME)/HARD-WIRED MEMORY OF MENTAL SPACE-TIME

Multiple actuator "arms" (i.e., laser/light, atom, synapse) of "memory/data" recall/receive/transmit (ultimate destination(s) of the data)

Binary access (+/- energy, etc.)

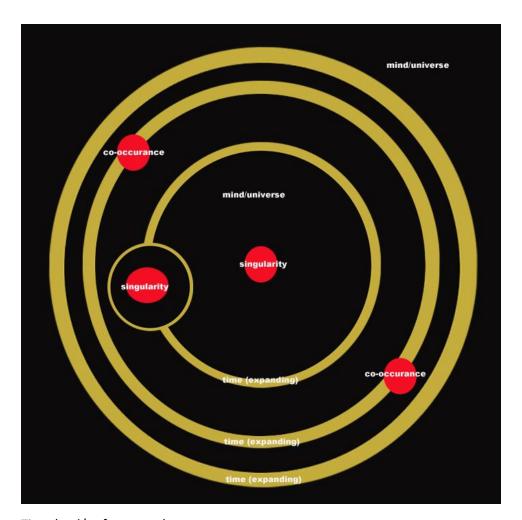

Binary decision... chain of events/random chain of events Mental dynamic of a decision

MULTIPLE HARDDRIVES OF REALITY & TIME EXPANSION/CONTRACTION -the actuator "arm" creates the "warp"

Time dilation/memory dilation

Mental overlap versus mental frequency

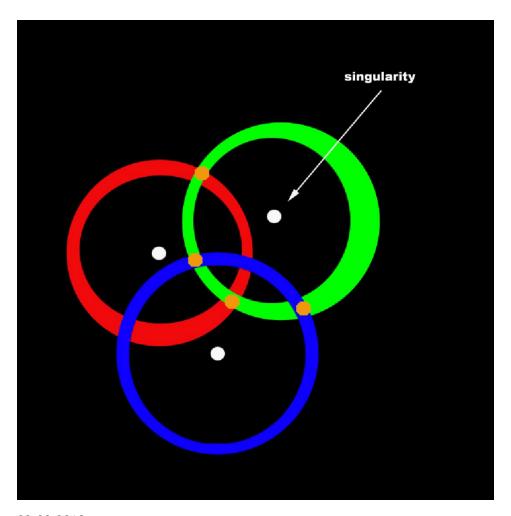

Nucleus of time (atomic structure)

Time (and/or frequency)

12-21-2017

String theory

--"vibrational" (frequency/oscillatory?)

Is quantum simply a matter of time(s)... differential oscillation(s)?

Hallucinations are data input... whether or not they are perceived as real (can they then be explained through oscillation... neural/electrical binary input... etc.?)

hallucinogens and parallel universes and why the concept of space/time is a factor insofar as time serves as a GPS of the universe with probable unknown dimensions... dimensions not requiring a body/the known senses... but are still seen as a driving energy where energy can also be equated to data (i.e. particle/sub-particle waves)

Unknown senses of the mind
Unknown dimensions... of the mind
Definition of dimension
Definition of hallucination (causality???)
Perceived nature of time (causality...)
Quantum dimensions

Definition of CAUSALITY

plural causalities

: a <u>causal</u> quality or agency

: the relation between a <u>cause</u> and its effect or between regularly correlated events or phenomena

Cognition is "the mental action or process of acquiring knowledge and understanding through thought, experience, and the senses"

Atom clocks and gravity.... states that the closer THE ATOM CLOCK itself is to earth, time will be measurably slower than at a higher elevation....or.... more accurately <gravity simply affected the atomic structure of the clock and not time itself>

Time... or the measurement of it... is simply based on individual perception, vis-à-vis "singularity"... since there is no universal standard of measuring time from one spot in the universe to another... an atom clock will not be reliable in setting a universal standard of measurement of time since even the structure of an atom clock can be compromised depending on what environment the clock is situated in. Given the fact that everything is in constant motion, and thus the environment constantly changes, it will be difficult to sustain the integrity of an atom clock measurement.

Objects may move faster or slower within the confines of space, but that does not change the integrity of time itself within such a confined space, if the true assumption is that time itself actually is constant, but time would have to be defined as a constant factor that is universally measurable by a tool that is actually capable of sustaining a constant measurement, of which an atomic clock is not. For now, time is simply relevant, not through precise measurement or changes in those measurements, but by individual observations that are only relevant to the individuals observing... which may perhaps redefine "singularity" instead as individual observations.

Is time constant? If so, is time constantly moving... or is time constantly standing still while everything else moves? For time to be constant, would it have to be the latter?

Time Perception <wiki>

Although the perception of time is not associated with a specific sensory system, <u>psychologists</u> and <u>neuroscientists</u> suggest that humans do have a system, or several complementary systems, governing the <u>perception</u> of <u>time</u>.[12] <wiki>

<u>Parkinson's disease,[76] schizophrenia,[77]</u> and <u>attention deficit hyperactivity disorder</u> (ADHD)[78] have been linked to abnormalities in <u>dopamine</u> levels in the brain as well as to noticeable impairments in time perception. <wiki>

Along with other perceptual abnormalities, it has been noted by psychologists that schizophrenia
patients have an altered sense of time. This was first described in psychology by Minkowski in 1927.[81]
Many schizophrenic patients stop perceiving time as a flow of causally linked events. It has been suggested that there is usually a delay in time perception in schizophrenic patients compared to normal subjects.

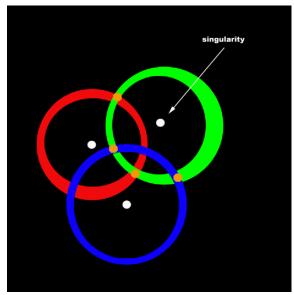

These defects in time perception may play a part in the hallucinations and delusions experienced by schizophrenic patients according to some studies. Some researchers suggest that "abnormal timing judgment leads to a deficit in action attribution and action perception." [81] <wiki>https://en.wikipedia.org/wiki/Time_perception

https://en.wikipedia.org/wiki/Cannabis and time perception

Multiverse... multiple wavelengths of the senses (Extra-Sensory Perception)... multiple perceptions... multiple time tables... & the mind factor (factoring in the mind's senses... especially when the other senses are not in play... is this the nature of death... traversing the other known bodily senses in a mental dimension that is capable of being recalled like data that is floating around in other oscillatory dimensions?)

Psychotropics... gates-ways of the Multiverse (as is mental illness)??? More detailed definition of "prophet" that is otherwise unscientific / unsubstantiated... i.e., limited by current technology, philosophy, unguided/channeled "GPS" of the "spirit" of genius, etc.

- --Picking up radio waves, visual wave lengths, etc...
- --Add multiple dimensions of time (singularities) to multiple spectrums
- --Are synapses actually misfiring... or are they just more sensitive to other ranges within other spectrums due to (mostly) traumatic (physically/emotionally/chemically) events that alter brain composition?

Can parallel universes or multiverses exist... not in the traditional sense, but as a component of the mind or mind energy?

How infinite/unlimited is the mind universe?

Can motion (or lack thereof) disrupt or influence a spacetime coordinate (event)... (i.e. earth in constant motion versus not in motion)... or is it all just relative at this point? (in which case this may account for multiple universes/timelines etc.)... what's the difference between a relativity and a perspective, if any?

CAN TIME BE DEFINED... OR REDEFINED?

perception of time is not the same as actual time

Time is not reliant on space (or gravity) (unless time is solely based on movements within space), even though perceptions may rely on EITHER time and/or space... this, however, does not affect time itself or even space itself... it is perception that is reliant on motion within space where time is always the constant... though distance in space, especially with motion, may not always be constant.

Which is more constant... the speed of light... or the concept of time... in other words, which is more accurate (stars and planets aside/disregarded as measuring instruments for either light or time)?

- --What is the relevance of metric time... or time not measured by the rotation of celestial bodies
- --is an atomic clock 100% accurate in any "environment"?
- --is time more accurate outside the confines of galaxies full of stars, planets and moons?
- --What is actual/true time... or is such a concept too biased to stand on its own?
- --can an atomic clock's integrity be interrupted by a system or environment of movement (earthly movement, clock movement, etc... in which case electrons and energy levels at different altitudes are capable of "disrupting" the integrity and accuracy of the clock's makeup?
- --20 billionths of a second is such a small difference between atom clocks that were otherwise completely synced in the same space/environment that who's to say that environmental differences like altitude and atom restructuring due to altitude over several days could have played a factor in throwing off sync. TIME ITSELF NEITHER SPED UP OR SLOWED DOWN... only the instruments' accuracy for measuring time changed.
- --DEFINE TIME AS THE CONSTANT AND RELATED CALCULATIONS WILL PROBABLY BE MUCH MORE ACCURATE AND PROVABLE.... OR JUST LEAVE TIME OUT THE EQUATION ALL TOGETHER
- --WHAT IS WRAPPED TIME... IS IT SIMPLY TIME THAT DOES NOT CORRESPOND TO OUR NOTION, MEASUREMENT AND SELF REALIZATION OF TIME?
- --PERHAPS A THEORY OF EVERYTHING (OR UNIFYING THEORY) IS A THEORY WHERE TIME IS CONSTANT IN RELATION TO EVERYTHING

COGNITION OF SPACE....
GALAXY / BRAIN
STARS / NEUROL NETWORKS
ENERGY / DATA

Would quantum entanglement require time to be redefined as "a constant unmeasured non-movement factor"... of a certain space... in order for quantum entanglement to function? --waves... of energy... of data... "sensory" data --Channeling/frequency... with "time" as a factor/non-factor --frequency of... "dimensions" --quantum time/frequency/dimensions --controllable streams (linear/linear time) versus quantum time/frequencies --elastic/disproportionate waves (quantum)... due to... wave collision, gravity, etc.??? (does a collision change the frequency of a wave/waves???... how does gravity play into a collision??? Can a collision disrupt gravity???) --super collider... not just particles??? Waves as well??? rel-a-tiv-i-ty relə tivədē/ noun 1. the absence of standards of absolute and universal application. "moral relativity" <assuming TIME is an absolute and universal application... time would not be relevant to relativity... relativity would not be relevant to time... where does that leave SPACETIME at?> DO STARS ONLY APPEAR IN GALAXIES... No (intergalactic stars) STRING THEORY... vibrational... frequency... waves... BINARY **Deep Brain Stimulation**

DOES MEDIATION MAKE IT EASER TO PICK UP "DATA WAVES" EXTERNAL TO THE BRAIN/MIND?

BINARY DATA OF THE BRAIN (string theory???)

We are memories / data the sum of voltage that migrates from to glorified hard drives
Neuron in plasma
IS TIME TRAVEL ONLY POSSIBLE WITHIN THE REALM OF MULTIVERSES/PARALLEL UNIVERSES? (AS EACH UNIVERSE HAS ITS OWN TIME LINE/SINGULARITY/uni-formity)
String theory/wavy theory/frequencies that occur within (or among) parallel universes on a quantum scale
Radiation (or some other energy I.e. negative energy) energy transmittable among multiverses
If multiverses do exist does communication between them occur in binary terms?
https://www.newdawnmagazine.com/articles/time-travel-the-multiverse-many-worlds-many-timelineswww.mariedjones.com
Can cyberspace lend itself to possible multiverses?

The conduction of nerve impulses is an example of an <u>all-or-none</u> response. In other words, if a neuron responds at all, then it must respond completely. Greater intensity of stimulation, like brighter image/louder sound, does not produce a stronger signal, but can increase firing frequency. [22]:31 Receptors respond in different ways to stimuli. Slowly adapting or <u>tonic receptors</u> respond to steady stimulus and produce a steady rate of firing. Tonic receptors most often respond to increased intensity of stimulus by increasing their firing frequency, usually as a power function of stimulus plotted against impulses per second. This can be likened to an intrinsic property of light where greater intensity of a specific frequency (color) requires more photons, as the photons can't become "stronger" for a specific frequency. https://en.wikipedia.org/wiki/Neuron

FREQUENCY EFFECT...beacon <loop... string...>... interdimensional... mental-dimensional... cloud (data/memory... quantum)... hemispherical... binary (2 distinct halves)... vivid thought process...

FREQUENCY EFFECT explained in relation to multiple dimensions... honing device (beacon) between dimensions of quantum mental constructs in the form of a wave (frequency) on a continuous loop fed binaurally to (through) the brain to excite an interaction between dimensions

wherein these two or more separate dimensions encompass thought/data/binary signal elements... with the potential of element exchange/communication... (string theory correlation???)

With the brain split into two halves, does this allow for communication into mental dimensions through a "binary" means... i.e. brainwave entrainment as part of the process?

Each brain/mind is a singularity/timeline/clock/spacetime within a multiverse of mental dimensions Hallucinations are as real as the mind... how real is the mind?

https://en.wikipedia.org/wiki/Nootropic

Can time "swirl" (as a perspective... within dark or negative energy) just as water swirls... galaxies swirl...

http://definition.org/amazing-inventions-wont-believe-exist/28/

binary data (thoughts/frequency)... binary stimulation (entrainment/frequency)... brain waves (frequency) ---> SYNC ---> radio waves (frequency)

In order to understand time travel capabilities, does time itself need to be redefined?

Known universe versus unknown universe

The complexities of the mind are just as complex as the universe itself.

Breakdown of stimulants to a quantum level... inducing "quantum thinking" in terms of "leaps" Leaps of the brain/mind in space-time... rescaling that leap on a galactic level

Billions of neurons per "system" = quantum "functioning"?????

wave mechanical model (quantum mechanics)

<<<Measuring in waves (frequencies)>>>

What is the relation between quantum mechanics and black holes? (or black holes on a quantum scale)

https://en.wikipedia.org/wiki/Quantum mind

Destiny... is it inevitable on a cosmic scale... with the mind playing a major role? Cosmology/astrology

The importance of psychology and psychiatry to quantum physics is that the mind... the brain itself... is a whole universe with billions of neurons... mappable in quantum terms... explorable in quantum terms and on quantum levels. By observing mental states, it becomes that much more possible to observe quantum states.

The theories of time that abound depend on what standard or definition is placed on time. If time is consistent in nature, then the boundaries of time are severally limited.

Assuming time itself is actually consistent, what would define a time travel event?

For time to change/travel, reality would have to change... reality is based on perceptions... perceptions are mental... something mentally would have to change/travel in order for time to travel... hence mind travel... on a time scale... or time travel on a mind scale... via altering reality... mind altering... mind altering substance... time altering substance... is this the only way time travel is possible? Not physically... but mentally? What about virtually? As in virtual reality... virtual time travel. What about mixed reality? Can mixed reality cause mixed time travel, producing an alternate time line?

There will always be a timeline that is consistent in reality...

In mixed reality... mixed timelines can occur... one consistent... one that can be altered... Would we have to get to a point were virtual/mixed reality is just as real as reality in order to obtain an alternate timeline that can be traveled back and forth upon? Insertion in a continuously recorded virtual reality.

Recorded virtual reality timeline = time travel in an alternate reality...

Is it possible that mental insertion into an alternate reality has already happened?

What role could a mental illness (schizophrenia, Alzheimer's, amnesia) play in time travel? Could a mental illness alternately be called "time insertion" or "time displacement"?

Extrasensory = extra-sensitivity... to wave frequency (i.e. via certain allergies/hypersensitivity... as well as mental disorders such as schizophrenia)?

Neural mental imaging

Can sensory deprivation lead to heightened neural sensory input (i.e. electrical impulses)?

- ***Quantum Metabolism of/within the nervous system
- --mind altering substances (extra-dimensional???)
- --stimulants (that extra cup of coffee) that cause increased mental/cognitive activity... connecting the dots... factor in brainwave entrainment when present?
- --subconscious "prodding"/stimulation
- --emotional trigger

HALLUCINATIONS... observable quantum phenomena... time displacement via Chronon unit of noncontinuous time... brain wave factor

TIME PARTICLE... BUBBLE

UNIVERSAL TIME OF A SINGLE UNIVERSE... AS OPPOSE TO MUTIPLE UNIVERSES/TIMES BUBBLE/MEMBRANE... FROM A SINGLE MEMBRANE TO MULTIPLE MEMBRANES FLOATING SEPARATELY... WILL TIME POP INSTEAD OF OVERLAP IF HEADED ON A COLLISION COURSE? GALAXY=UNIVERSE=BLACKHOLE=TIME

WHAT HAPPENS WHEN GALAXIES COLLIDE?

GALAXY OF THE MIND/NEURONS

GENERAL RELATIVITY OF THE MIND... social gravity/civilization... mental/social dynamics (perspective)... mental perspective/time perspective... social bubbles... mental bubbles Bubbles burst... civilizations burst... time bursts/becomes something else... relatively speaking... changes perspective

In SPACETIME... time would definitely be a matter of perception/perspective if space and time go hand-in-hand... BUT DO SPACE AND TIME REALLY GO HAND-IN-HAND? WOULD THE PROSPECT OF TIME SIMPLY RELY ON ITS DEFINITION? OR IS THERE TRUE RELEVANCE BETWEEN SPACE AND TIME? IF TIME IS DEFINED AS A CONTANT... THEN THERE IS NO RELEVANCE BETWEEN SPACE AND TIME SINCE SPACE CAN HAVE A TENDENCY TO BE INCONSISTANT... OR CAN ONE BE CONTANT WHILE THE OTHER IS INCONSISTANT AND STILL BE RELEVANT TO ONE ANOTHER... CAN TIME BE UNIVERSAL AND SPACE NOT BE UNIVERSAL? IS THE TRUE NATURE OF THE UNIVERSE THAT OF EXPANDING SPACE AND TIME?

ORBITAL SPACETIME/CYCLICAL...

Does TIME=GRAVITY?

Wormhole gravity... is wormhole gravity a scaled-up version of quantum mechanics? Time travel at quantum wormhole level as opposed to time travel at galaxy wormhole level... this would still imply a relationship between space and time that is not consistent CAN YOU MEET A PAST OR FUTURE VERSION OF YOURSELF WITH THE HELP OF A WORMHOLE? OR DOES TIME TRAVEL HAVE TO BE REDEFINED WITHIN THE PERAMETERS OF WHAT A WORMHOLE IS ACTUALLY CAPABLE OF... WHICH IS WARPING SPACE... BUT NOT NECESSARILY TIME AS WELL SINCE IT WOULD JUST SIMPLY MEAN THAT IT WOULD TAKE LESS TIME TO REACH A DESTINATION WITH THE HELP OF A WORMHOLE... A DETOUR... A

SPACE DETOUR... NOT A TIME DETOUR AS FAR AS ACTUAL EVENTS ARE CONCERNED AND OBJECTS WITHIN THOSE EVENTS... AN OBJECT ITSELF WOULD NOT NECESSARILY CHANGE IN RELATION TO PAST/PRESENT/FUTURE TO MEET A SPACE DETOUR... OR WOULD IT... YOU WOULD NEED TWO VERSIONS OF THE SAME OBJECT... ONE TO TAKE THE DETOUR AND ONE NOT TO TAKE THE DETOUR... HENCE... A MULTIUNIVERSE WOULD HAVE TO EXIST IN ORDER FOR "OBJECT CHANGING" TIME TRAVEL TO EXIST... TECHNICALLY, HOWEVER, A MULTIVERSE WOULD MEAN THAT AN OBJECT ITSELF WOULD NOT CHANGE... JUST MULTIPLE VERSIONS WOULD EXIST

</2020-06-20>

<2020-06-22>

Misfiring synaptic gap... alternate universe with alternate perceptions... alternate reality... alternate timeline... which again begs the question... what is a hallucination? (especially in relation to time)

Nuclear/nucleus/neuron event (scalable)

3 dimensions of space

4th dimension is time

5th dimension and beyond would be mental... or scalable as gravitational and so on...

Misfiring synapse=mistranslated electrical data

<CITE>

Another critical molecule that regulates neuronal firing is the inhibitory neurotransmitter GABA. A variety of deficits in GABAergic markers in the PFC have been reported in postmortem SZ brain studies, which has indicated that SZ is associated with lower inhibitory transmission. One of the principal roles of GABA in the inhibition of neuronal excitability is to synchronize neuronal networks, which generates rhythmic or bursting neural activity, termed oscillations. A persistent oscillatory firing of a context-specific neural ensemble in the PFC enables distinct information to be linked across time and space (different brain regions), which results in the integration of sensory and mnemonic information; in turn, this integrates and manipulates multiple representations. Thus, proper oscillatory firing in the PFC is believed to serve as a cellular mechanism of working memory. Considering that working memory deficits have been proposed to underlie a broad range of cognitive deficits in SZ patients, disruption of PFC oscillation could be involved in SZ.
